The assumed level of intoxication is 0% to 0.08% blood alcohol concentration (BAC) depending upon your country. Visit http://trafficsafety.org/bac to see your country’s BAC.

38.6% of fatal collisions are as a result of impaired drivers with a 0.08% BAC or higher.

DID YOU KNOW?

\[
\begin{align*}
355 \text{ ml of beer} & \quad (5\% \text{ alcohol}) \\
148 \text{ ml of wine} & \quad (12\% \text{ alcohol}) \\
44 \text{ ml of liquor} & \quad (40\% \text{ alcohol}) \\
\hline
\text{.20\% blood alcohol} + 8 \text{ hours of sleep} & = .08\% \text{ blood alcohol} \\
\Rightarrow & \quad \text{YOU COULD STILL BE ARRESTED FOR A DUI AFTER 8 HOURS OF SLEEP!}
\end{align*}
\]
